

Kitchen Roll Rocket

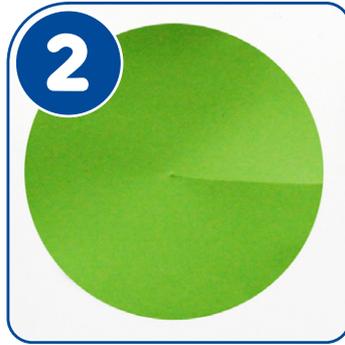

Get ready for blast off with this kitchen roll rocket! Get creative with glue, paper and an empty kitchen roll tube and make your own rocket to go exploring the universe.

You will need:

- Empty kitchen roll tube
- Coloured paper
- Sticky tape
- Black felt tipped pen
- Pencil
- Glue
- Scissors

1 Cut a strip of coloured paper to fit around the tube. Add glue to one side then wrap the paper around the tube.

2 Cut out a circle and add a slit to the centre. Curve the paper around itself to form a nose cone and stick it on the top of the tube.

3 Use strips of paper to decorate the sides of your rocket.

4 Use discs of coloured paper for the windows. Draw on the details with a pen.

5 Cut out paper fins and slot them into cuts at the bottom of the tube. Add sticky tape on the inside of the tube to hold them in place. You're now ready for the big countdown!

Imagine all the places your rocket is going to visit. Will it go to Mars or the Moon? What kind of creatures will you meet on your travels?
